1. It is time to making the town fiscally sound by sharing services, working closely with local volunteer organizations and the Village. I believe each hamlet in the township has its

own personality; by bringing the residents of these hamlets together, a unified voice will be represented by me at town meetings.

2. My greatest strength is in having lived in this community all my life. As a past government official, I understand that government is the tool of the people's will. I will listen to everyone's concerns and bring to the board their wishes, vote realistically on matters. Work with the board, yet have my own mind; my record on the village board shows that I vote for the good of the whole community, and will continue to work in this manner when elected.

3. To first complete the many projects that have been started in our town over the past several years, such as the Napanoch Water District, Napanoch Day Care Center, and the Kerhonkson Bridge. I will work to bring new stores to the Napanoch Mall, to encourage new businesses to locate in our town, while retaining and supporting those still here.

1-4. Councilmen should be on top of every penny of the taxpayer's money; there are no bottomless pockets, especially those on fixed incomes. Sharing services, with not only the village, but also the county. Privatizing the airport and Napanoch Day care center; there cannot be anymore Napanoch Water Project fiascoes. We can draw experience from other communities; grants cost taxpayer's money, up front! Sometimes it benefits a community to cut the ties: if we privatize to a qualified buyer, the property would at least be back on the tax rolls. We need services in the town; service cost money, but someone has to oversee the projects, and make sure they are successful.
